WST2

Bridge Condition Inspection Update (BCIU)

A two-day course
Fee: Free
Time: 8:00 am to 5:00 pm
Class Size: 40
Locations: Lacey and Moses Lake each year.

Instructors
WSDOT Highways & Local Programs, Bridge Office, and Hydraulics Office

Target Audience
Washington State local agency experienced bridge inspectors.

Course Description
This course will provide information on the latest inspection manual, Laptop98 bridge inspection software, bridge file records, and other important bridge inspection issues. Questions and concerns brought to the workshop will be discussed and resolved. There will be discussion on sufficiency ratings and proper coding of bridge elements.

Course Objectives
Persons completing this training will understand the Bridge Inspection Manual, Laptop98 Bridge Inspection Software, bridge file requirements, and sufficiency ratings.

Topics
- Washington State Bridge Inspection Manual
- Washington State Bridge Inventory System (WSBIS)
- Bridge Management System (BMS)
- Laptop Bridge Inspection Software
- Bridge Files, NBIS Compliance
- Bridge Inspection and Coding
- Open Forum

Please Note: This class does not go into the field.

Materials
Participants should bring the following items if available:
- Washington State Bridge Inspection Manual (January 2002)
- Laptop computer
